# CUSTOM IN-EAR MONITORING

**CIEM** are custom fit earphones suited for high precision sound reproduction and noise isolation. They secure a reliable fit and at the same time block out unwanted surrounding noise. Although the main service is aimed at on-stage musicians, more and more audiophile consumers appreciate the advantages of a customized earphone.

rhines customs uses hard acrylic exclusively, which is extremely robust and guarantees a long durability.

**Felix Reinsch**, name giver and owner of rhines custom monitors, is already active as developer in the branch since the mid nineties. It's this kind of experience and commitment that defines rhines customs.

In 2007 Felix Reinsch began with the development of an in-ear series that was supposed to achieve international fame with his company Compact Monitors: the Stage series. Thousands of times approved by musicians, sound engineers and hifi customers, it is sought after and favored to this day.

The rest of the team consists of experienced on-stage musicians, sound engineers and graduated acousticians.

# ROOKIE

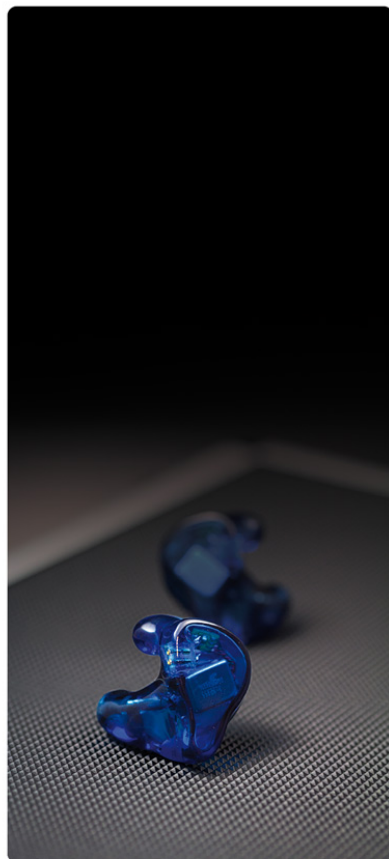

**With the Rookie** rhines customs offer an efficient and professional double-driver monitor that foremost impresses by the price-performance ratio. Even though the Rookie is but the entrance into rhines' assortment, it provides precise and reliable monitoring capabilities for high-demanding users, nevertheless.

Because of the better dynamics and fuller bass reproduction, the Rookie replaces the Stage 1.2 (which is still available if requested).

By default, the Rookie comes in rhines blue, replaceable cables and with a convenient zipper pouch.

The ambience system, as well as design customizations, are available for a surcharge.

2 „Balanced Armature“-  
precision drivers  
up to 26dB noise isolation  
gold-plated 3,5mm connector  
20Hz-16kHz frequency response  
122dB input sensitivity at 1mW  
28 ohms impedance  
**price** starting at 599 €

# The STAGE Series

**The combination of established** high-quality components and perfectionist craftsmanship make the Stage series of rhines professional work tools of reference quality.

The rhines Stage series provides optimal comfort and low-key looks by individual custom fitting. It withstands the strain of the conscientious musician. The rhines Stage clings to the wearer's ear without any signs of discomfort by the robust acrylic.

**Today, more than ever,** rhines customs represents German craftsmanship paired with the will to continuously outdo itself and to develop new innovations. The constantly raising demands of musicians, sound engineers and audiophiles are a great incentive and source of inspiration for the whole team at rhines. Our Stage series was designed to provide the option to upgrade anytime from a previous model to the next.

One can freely allow one's creative vein full bent when designing the looks of the rhines earphone.

# STAGE 2

## **rhines' classic.**

Thousand fold proven top-class monitoring in two-way technology.

The rhines Stage 2 has a balanced sound with pleasant warmth, natural voices and tight punch.

Based on experience, especially drummers and bassists go for the Stage 2. But also in the audiophile branch the Stage 2 achieves to continuously increase popularity since it was first introduced.

As entrance into the rhines Stage series, this monitor can be upgraded afterwards to any other model within the series.

2 „Balanced Armature“  
precision drivers  
up to 26dB noise isolation  
gold-plated 3,5mm connector  
20Hz-17kHz frequency response  
122dB input sensitivity at 1mW  
28 ohms impedance  
**price** starting at 769 €

# STAGE 3

**The Stage 3** is a very linear tuned reference monitor that targets experienced and demanding musicians and engineers that value a highly transparent sound. Low, mid and high frequencies are precisely synchronized and balanced out.

Yet the rhines Stage 3 foregoes a cold and analytical presentation. The sound signature is pleasant, intimate and emotional but doesn't cause any fatigue even after enduring usage. Though it reveals even smallest details.

Therefore the rhines Stage 3 stays true to the source material like no other.

3 „Balanced Armature“-  
precision drivers  
up to 26dB noise isolation  
gold-plated 3,5mm connector  
20Hz-18kHz frequency response  
118dB input sensitivity at 1mW  
18 ohms impedance  
**price** starting at 999 €

# STAGE 4

The **rhines Stage 4 monitor** extends both ends of the frequency spectrum even further. Trained and spoiled ears will appreciate the elevation on both ends.

The moderately balanced v-shape creates a musical and engaging big sound with astonishing depth.

The rhines Stage 4 reveals even the smallest of details of every HD material.

4 „Balanced Armature“-  
precision drivers  
up to 26dB noise isolation  
gold-plated 3,5mm connector  
10Hz-19kHz frequency response  
120dB input sensitivity at 1mW  
20 ohms impedance  
**price** starting at 1239 €

# STAGE 5

a new level of transparency

With **5 drivers maxed** to their full potential, the Stage 5 offers the greatest extension within the series. The highs offer a silky smooth presentation without peaks that allow never before experienced airiness and separation within a big sound stage. The low end is bottomless and accurate and transitions smoothly into breath-takingly precise mids.

The natural tuning of the Stage 5 offers incredible details whilst staying true to the source. It truly deserves the phrasing 'a new level of transparency!'

5	„Balanced Armature“-precision drivers
up to 26dB	noise isolation
gold-plated	3,5mm connector
10Hz-20kHz	frequency response
120dB	input sensitivity at 1mW
24 ohms	impedance
price	starting at 1379 €

# ACCESSORIES

**All of the rhines** Stage monitors come in an all-inclusive package containing a very sturdy individually laser-engraved aluminum case, 6.3mm stereo adapter, shirt clip, carrying pouch, drying capsules, cleaning pen and cleaning spray.

Optionally, customers can opt for a noble étui from real wood instead of the aluminum box. Naturally personalized with name tag.

We also offer mini-cases, soft pouches, full adapter sets, drying boxes and more. All of our accessories are also sold separately.

# COLOR OPTIONS

Our service includes free color selection for every rhines Stage in-ear monitor.

**Our color selection** consists of translucent and opaque scopes for design. The color palette ranges from vivid colors to low-key looks and also contains highly elegant hues.

The colors can optionally be extended by different grades and colors of glitter options.
